## NEW CRIMSON SPIRÆA.

Anthony Waterer.

This beautiful new crimson-flowered Spiræa was introduced last year for the first time. It outshines all the Spiræas in brilliancy of color—a bright crimson. It is a rare gem.

It makes a low, compact bush, 15 to 18 inches high, and is covered nearly the whole growing season with large umbels of deep crimson flowers, which measure nearly a foot across. When scarcely 3 inches high it begins to bloom and thereafter is seldom out of flower. As a pot plant or for growing in the open ground, nothing can equal it. Perfectly hardy, it is unquestionably one of the really meritorious plants that we cannot have too many of. 10 to 20 cts. each.
